

CLS Coin Recycler

Increase Teller Efficiency with High Speed Coin Recycling

Counting coin deposits can be a laborious task for bank tellers. By integrating a secure recycling solution coins can be automatically counted, stored and paid out as change to other customers.

By automating coin handling, the CLS offers a cost-effective way to offset rising labor costs through and improve staff productivity, while improving transaction speed for customers and allowing the bank teller to focus on the customer.

Noted for its high speed and compact format, the CLS also accounts for every coin going in and out of the system, which removes the need for reconciliations at the end of the day.

Experience the CLS Coin Recycler, a new level of engineering excellence.

BENEFITS:

- **Accelerate customer throughput.** Faster transactions. 50 coins in, 10 coin per second acceptance. Speed customers through the payment process.
- **Design flexibility.** The compact dimensions of the CLS provides flexibility and minimizes real estate.
- **Maximize uptime.** The high capacity of the CLS reduces the need for refilling and teller intervention.
- **Enhanced security.** Fully enclosed, dual-locking system keeps coins secure.
- **Recycle up to 8 different coins.** The CLS has double and triple size hoppers if you only need to recycle fewer denominations.

Nearly 80% of US Banks do not have the right level of coin deposit services required by merchants.
