**HT-19 provides whisper quiet
fast and safe transportation for:**

- ATM Replenishment
- Shipping Documents
- Pharmaceuticals
- Currency and Coins
- Office Supplies
- Small Supplies
- Components
- Production Parts
- Checks
- Job Tickets

HAMILTON SAFE®

The Hamilton HT-19 point-to-point delivery system

Easy to operate, affordable and easy to install, the Hamilton HT-19 pneumatic delivery system saves time and increases security when you need to move items like currency, coins, papers or parts from one station to another.

To operate, simply place an item in the carrier, close the door and the carrier is whisked away to its remote terminal.

HT-19 advantages include:

Time Saving. The system moves a carrier and its contents faster than any messenger and it eliminates the need for a manager to supervise the movement of high-security items like cash or pharmaceuticals. HT-19 is ideal for long distances or multi-floor environments.

Added Security. It's almost impossible to intercept an HT-19 carrier without detection.

Built to Last. Made of tough, high-impact plastic, aluminum and stainless steel, the HT-19 will stand up to heavy use with little or no maintenance.

Soft Landings. Where careful handling is a requirement, HT-19 is the answer. Soft landings at both the send and receiving ends of the HT-19 run are assured by conscientious Hamilton engineering.

Whisper Quiet. Because HT-19's air turbines are mounted away from the carrier stations, the only sound you're likely to hear during operation is the gentle whisper of air moving through the system.

HAMILTON SAFE®

Manufacturers and providers of the latest in drive-up systems, modular vaults, vault doors, night depositories, physical security containers, alarm systems, safe deposit boxes and video surveillance equipment.
