

DT-7000

P5500L

Branch Bulk Cash Recycler

Self-made cash recycling technology

High scalability

High speed cash processing module

Easy deployment and maintenance

The P5500L is GRGBanking's latest branch bulk cash recycler, which is integrated with GRGBanking's latest recycling technology. The fast cash processing speed and scalability of the P5500L makes it an ideal terminal for modern branches. The P5500L not only transfers cash services from the teller to a self-servicing solution, but also some key financial services, like bank statement printing and card issuing, which helps branches provide more automated and efficient financial services within the branch.
